

C1000 Configurable Tube/ Solid-State Controller and Preamplifier

# "all of McIntosh's **Engineering expertise** in a **ChOiCE** of solid-state, tube or **bOth**"

Thinks

li: latosia

Colosh

The debate over which sounds better; tubes or transistors, is still going strong after forty years. McIntosh has led in both technologies and the C1000 raises the bar once again. A three chassis design allows the customer the flexibility to choose solid state, vacuum tube or both technologies.

Music handling is accomplished in its own Dual Mono, preamplification module, yielding over 130dB of channel separation for ultimate stereo fidelity.

All three modules may be combined for the ultimate in flexibility, with each source available through either preamplification module, selectable at the push of a remote-control button.

The C1000's are available exclusively through select McIntosh Authorized Premier Dealers.

Low Noise MM and MC Phono Inputs Fully Balanced Circuitry Dual Mono, Mirror Image Design 3 Outputs per Channel for Tri-Amping Listen and Record Processor Loops Peak Responding Output Meters Front-Panel 1/4" Headphone Jack Remote Controllable Fiber-Optic Front Panel Illumination Florescent Display of Operating Modes Pass through Home Theater Mode

OUTPUT A Tradition of Excellence

For the Consumer's Protection: In order to ensure the highest level of customer satisfaction, "new" McIntosh products may only be purchased over-the-counter or delivered and installed by an Authorized McIntosh Dealer. McIntosh products that are purchased over the Internet, by phone or mail order are presumed to be "used" and do not qualify for any McIntosh Warranty. McIntosh does not warrant, in any way, products that are purchased from anyone who is not an Authorized Dealer or products that have had their serial number altered or defaced.

# C1000 Controller Preamp

#### TRI-AMPLIFICATION

All three balanced outputs carry the same signal and bypass switching when the TRI-MODE is programmed. This allows tri-amplification of a speaker set, while the unbalanced outputs will still switch to control a remote amplifier.

# VRV (VARIABLE RATE VOLUME) DIGITALLY CONTROLLED ATTENUATOR

The output attenuator controls volume over 214 steps of .5dB each with accuracy within .1dB. The volume versus rotation rate varies as preamplifier gain varies and attenuation changes occur at the zero crossings of the audio signal to prevent audible artifacts during adjustment.

#### **ELECTROMAGNETIC SWITCHING**

Signal routing is accomplished through digitally controlled electromagnetic switching devices. Precision switch contacts, isolated from environmental contamination inside inert gas-filled tubes, provide the most reliable, quietest and lowest distortion switching possible.

### **PHONO SECTION FLEXIBILITY**

Moving Magnet has adjustable capacitance from the remote to allow flexibility in matching your favorite turntable. Moving Coil offers adjustable resistance also from the remote control for the same flexibility.

# C1000P: +0, -0.5dB from 10Hz to 40kHz

C1000T: +0, -0.5dB from 10Hz to 20kHz

C1000P: 0.002% max from 20Hz to 20kHz C1000T: 0.8% from 20Hz to 20kHz

#### **RATED OUTPUT**

**FREQUENCY RESPONSE** 

C1000P and C1000T: Balanced: 5VRMS at MAIN, SPKR1 and SPKR2 Unbalanced: 2.5VRMS at MAIN, SPKR1 and SPKR2

#### **MAXIMUM VOLTAGE OUTPUT**

C1000P: 12V RMS Unbalanced, 25V RMS Balanced C1000T: 8V RMS Unbalanced, 16V RMS Balanced

#### INPUT IMPEDANCE

C1000P and C1000T: High Level, 22k ohms Phono MM, 47k ohms; 50 to 750pF, in 50pF steps Phono MC, 25, 50, 100, 200, 400 or 1,000 ohms; 100pF

OUTPUT IMPEDANCE

C1000P and C1000T: 220 ohms

#### SENSITIVITY

- C1000P: High Level, 450mV for 2.5V rated output
- Phono MM, 4.5mV for 2.5V rated output
- Phono MC, 0.45uV for 2.5V rated output
- C1000T: High Level, 450mV for 2.5V rated output
- Phono MM, 4.5mV for 2.5V rated output
- Phono MC, 0.45mV for 2.5V rated output

#### SIGNAL-TO-NOISE RATIO

- C1000P: High Level 100dB; Phono 88dB C1000T: High Level 93dB;
- Phono 80dB

# CHANNEL SEPARATION

C1000P and C100T: Greater than 130dB

#### **MAXIMUM INPUT SIGNAL**

C1000P and C1000T: High Level, 5V Unbalanced, 10V Balanced Phono MM, 50mV; Phono MC, 5mV

### **VOLTAGE GAIN**

C1000P and C1000T: Phono, MC to Record Out: 60dB Phono, MM to Record Out: 40dB High Level to Record Out: 0dB High Level to Main Out: 15dB

#### **POWER REQUIREMENTS**

100 Volts, 50/60Hz, 120 Watts 110 Volts, 50/60Hz, 120 Watts 120 Volts, 50/60Hz, 120 Watts 220 Volts, 50/60Hz, 120 Watts 230 Volts, 50/60Hz, 120 Watts 240 Volts, 50/60Hz, 120 Watts

#### TUBE COMPLIMENT C1000T

High Level: 4-12AX7A Phono: 4-12AX7A

OVERALL DIMENSIONS (H x W x D including knobs, connectors and feet)

- C1000C, C1000P and C1000T:
- 6" (15.24cm) x 17-1/2" (44.45cm) x 24" (61cm)

#### WEIGHT

- C1000C: 39 lbs. (17.7kg) net; 61.4 lbs. (27.9kg) in shipping carton
- C1000P: 33 lbs. (15kg) net; 53.6 lbs. (24.3kg) in shipping carton C1000T: 34 lbs. (15.4kg) net;
  - 54.6 lbs. (24.8kg) in shipping carton.
