

MC501

Power Amplifier

NEW

Promotional Highlights

The MC501, 500 watt mono block amplifier has a new and bold, yet unmistakably McIntosh look. It features 3-dimensional glass and new cool-running, ultra long life, fiber optic LED lighting. The chassis gleams in polished stainless steel. Upward facing connectors at the back make attaching cables easier. Three sets of huge gold-plated speaker posts will accept any cables.

The extraordinary quad-differential amplifier design reduces noise and distortion to record levels. While the MC501 delivers a massive 500 watts continuous power, and over 1200 watts of peak power into low impedances, its noise levels are, amazingly, 124dB below rated power.

Specifications

Rated Power Band: 20Hz to 20kHz

Total Harmonic Distortion: 0.005% maximum from 250 milliwatts to rated power output for 2, 4, or 8 ohm load

Dynamic Headroom: 1.8dB

Frequency Response: +0, -0.25dB from 20Hz to 20kHz; +0, -3dB from 10Hz to 100kHz

Sensitivity: 2.1V unbalanced input
4.2V balanced input

Overall Dimensions (H x W x D includes knobs and feet): 9-7/16" x 17-1/2" x 14-1/2"

Weight: 92 lbs. net

MSRP: \$4,100.00
